BOLTPe INSURANCE

Combined Validation PRD

Enquiry / Plans + Proposal Form + Unified Validation Message Catalogue

Document Item	Value
Scope	Backend validation only
Products	HEALTH, SUPER_TOP_UP, PERSONAL_ACCIDENT, HOSPITAL_CASH
Proposal client	bolt_pay
Downstream	Policy Planner
Purpose	Single combined reference covering all uploaded validation documents and the supplied backend source
Version date	30 September 2026

Important: Where the uploaded documents and current source differ, this document preserves both and calls out the alignment gap instead of silently changing either requirement.

1. Purpose and Scope

This document consolidates the validation requirements supplied for the BoltPe Insurance backend into one implementation-ready reference. It covers the Enquiry/Plans flow and the Proposal Form flow, including request wrapper validation, product-specific cover amounts, zone/category, family/DOB/age rules, member counts, tenure, height, weight, ABHA, contact and identity fields, annual income mapping, Yes/No fields, and error behaviour.

1.1 Source set consolidated

- Enquiry Form Validation Document
- Cover Amount Validation PRD
- Backend Zone & Category Validation PRD
- Proposal Form Request Body Validation
- Proposal Form DOB & Age Validation
- Proposal Form Family / Additional Validation
- Proposal Form Contact & Identity Validation
- Proposal Form Annual Income Validation
- Current uploaded src package (30 Sep 2026)

1.2 Global validation principles

- Validate BoltPe input before invoking Policy Planner/provider APIs.
- Reject missing, null, blank, malformed, unsupported, out-of-range, and wrong-type values according to the field-specific rules below.
- Do not silently coerce unsupported values into valid business values.
- For proposal validation, return HTTP 400 for validation failures and use field-level messages where the validator supports fieldErrors.
- When multiple validations are collected by the same validator, return the detected field-level errors together.
- Date mapping occurs only after BoltPe-side validation: BoltPe DD-MM-YYYY → Policy Planner YYYY-MM-DD.
- Annual income mapping occurs only after slab validation: frontend slab code → configured numeric annualIncome.
- Invalid BoltPe requests must not call the downstream Policy Planner/provider API.

2. Product and Flow Matrix

Flow	Product	Key discriminator / required product fields
Enquiry / Plans	HEALTH	insuranceType=HEALTH; coverAmount; zone; age
Enquiry / Plans	SUPER_TOP_UP	insuranceType=SUPER_TOP_UP; coverAmount; age
Enquiry / Plans	PERSONAL_ACCIDENT	insuranceType=PERSONAL_ACCIDENT; coverAmount; category; age
Enquiry / Plans	HOSPITAL_CASH	insuranceType=HOSPITAL_CASH; coverAmount; age; noOfAdults; noOfChildren; noOfDays
Proposal	HEALTH	client_name=bolt_pay; formType=health; insuranceType=HEALTH; group data
Proposal	SUPER_TOP_UP	client_name=bolt_pay; formType=supertopup; insuranceType=SUPER_TOP_UP; group data
Proposal	PERSONAL_ACCIDENT	client_name=bolt_pay; formType=pa; insuranceType=PERSONAL_ACCIDENT; PA data
Proposal	HOSPITAL_CASH	client_name=bolt_pay; formType=hospicash; insuranceType=HOSPITAL_CASH; group data

3. Enquiry / Plans Validation

3.1 Common request validation

Field / Rule	Applies to	Validation	Message
insuranceType	All products	Mandatory; must identify supported product	Insurance type must not be null
data	All products	Request data must be present and valid for	Invalid insurance request data

		selected product	
coverAmount	All products	Mandatory	Kindly select cover amount
Minimum adult/member	All products	At least one adult/member as applicable	Kindly select at least 1 adult

3.2 Enquiry coverAmount allowed values

Insurance Type	Allowed backend values
HEALTH	50000, 75000, 500000, 700000, 1000000, 1500000, 2000000, 2500000, 3000000, 3500000, 4000000, 4500000, 5000000, 7500000, 10000000, 20000000, 30000000, 40000000, 50000000
SUPER_TOP_UP	500000, 1000000, 1500000, 2000000, 2500000, 5000000, 10000000, 30000000
PERSONAL_ACCIDENT	1000000, 1500000, 2000000, 2500000, 3000000, 3500000, 5000000, 7500000, 10000000, 20000000, 30000000, 40000000, 50000000
HOSPITAL_CASH	500, 1000, 2000, 2500, 3000, 5000

Condition	Message
HEALTH unsupported cover	Invalid cover amount. Please select a cover amount from the available coverage options.
SUPER_TOP_UP unsupported cover	Invalid cover amount. Please select a cover amount from the available coverage options.
PERSONAL_ACCIDENT unsupported cover	Invalid cover amount. Please select a cover amount from the available Personal Accident coverage options.
HOSPITAL_CASH unsupported cover	Invalid Room Rent. Please select a Room Rent from the available Room Rent options.

3.3 Zone and category

Product	Field	Valid	Missing / blank	Invalid
HEALTH	zone	1, 2, 3	zone is required	zone must be one of: 1, 2, 3
PERSONAL_ACCIDENT	category	1, 2, 3	Kindly select category / category is required*	category must be one of: 1, 2, 3

**The enquiry document/source uses "Kindly select category" for mandatory PA category; the dedicated zone/category PRD uses "category is required". See alignment notes.*

3.4 Enquiry age and family rules

Rule	Validation / Message
Primary adult age	Required; whole number; age >= 18
Missing primary age	age is required / product-specific "Kindly select age..." message
Invalid whole number	age must be a valid whole number
Below 18	age must be at least 18
Spouse	Optional; whole number; if supplied age >= 18
Spouse invalid whole number	spouse_age must be a valid whole number
Spouse below 18	spouse_age must be at least 18
Children	Optional; whole number; age cannot be negative; previous fixed 0–25 maximum removed
Child invalid whole number	child_N_age must be a valid whole number
Child negative	child_N_age cannot be negative
Adult-child gap	parent age must be at least 21 years greater than child_N_age
Spouse-child gap	spouse age must be at least 21 years greater than child_N_age
Child-to-child gap in enquiry flow	minimum age difference between children must be 2 years

3.5 Hospital Cash enquiry-specific

Field	Rule	Message
age	Mandatory; valid age > 0 / adult rule applies	Kindly select age / Kindly select a valid age
noOfAdults	Mandatory; at least 1 adult	Kindly select number of adults / Kindly select at least 1 adult
noOfChildren	Mandatory; cannot be negative	Kindly select number of children / Invalid number of children
noOfDays	Mandatory; only 30, 60, 90, 180	Kindly select duration / Invalid duration. Please select 30, 60, 90 or 180 days.

4. Proposal Request Wrapper Validation

Field	Required	Allowed / Rule	Validation Message
client_name	Yes	String; bolt_pay only	client_name is required / client_name must be bolt_pay
formType	Yes	health, supertopup, pa, hospicash	formType is required / Invalid formType. Allowed values: health, supertopup, pa, hospicash
insuranceType	Yes	HEALTH, SUPER_TOP_UP, PERSONAL_ACCIDENT, HOSPITAL_CASH	insuranceType is required
data	Yes	Must be an object/map	data is required
productType	Yes in data	New or Portability	Invalid productType. Allowed values: New, Portability

4.1 formType ↔ insuranceType mapping

formType	insuranceType	Result
health	HEALTH	Valid
supertopup	SUPER_TOP_UP	Valid
pa	PERSONAL_ACCIDENT	Valid
hospicash	HOSPITAL_CASH	Valid
Any mismatched pair	—	Invalid: insuranceType does not match formType. Expected: <TYPE>

5. Proposal Cover Amount Validation

The current proposal source validates the business field as coverAmount but reads group proposal value from sumInsured; Personal Accident reads coverAmount. The allowed proposal values below come from the supplied cover-amount PRD and match the uploaded validator source.

Proposal Product	Allowed proposal coverAmount / sumInsured values
HEALTH	50000, 75000, 200000, 300000, 400000, 500000, 700000, 1000000, 1500000, 2000000, 2500000, 3000000, 3500000, 4000000, 4500000, 5000000, 7500000, 10000000, 20000000, 30000000, 40000000, 50000000
SUPER_TOP_UP	200000, 300000, 400000, 500000, 1000000, 1500000, 2000000, 2500000, 5000000, 10000000, 30000000
PERSONAL_ACCIDENT	1000000, 1500000, 2000000, 2500000, 3000000, 3500000, 5000000, 7500000, 10000000, 20000000, 30000000, 40000000, 50000000
HOSPITAL_CASH	1000000, 1500000, 2000000, 2500000, 3000000, 3500000, 5000000, 7500000, 10000000, 20000000, 30000000, 40000000, 50000000

Condition	Message
Missing / null	coverAmount is required
Invalid HEALTH	Invalid coverAmount for HEALTH insurance
Invalid SUPER_TOP_UP	Invalid coverAmount for SUPER_TOP_UP insurance
Invalid PERSONAL_ACCIDENT	Invalid coverAmount for PERSONAL_ACCIDENT insurance
Invalid HOSPITAL_CASH	Invalid coverAmount for HOSPITAL_CASH insurance

- Reject zero and negative values.
- Reject decimals/fractional values.
- Reject alphabetic, alphanumeric, special-character and other non-numeric values.
- Reject any positive whole number not present in the product-specific proposal list.
- Do not call Policy Planner when cover validation fails.

6. Proposal Group Request Mandatory Fields

Field	Validation message
productName	productName is required
productType	productType is required
pincode	pincode is required
cityState	cityState is required

zone	zone is required
upgradeZone	upgradeZone is required
adultCount	adultCount is required
childCount	childCount is required
proposerName	proposerName is required
proposerDOB	proposerDOB is required
proposerGender	proposerGender is required
proposerEmail	proposerEmail is required
proposerPhone	proposerPhone is required
sumInsured	sumInsured is required
selectedTenure	selectedTenure is required
annualIncome	annualIncome is required
nriDiscount	nriDiscount is required
includeSelf	includeSelf is required
bureauDiscount	bureauDiscount is required
aadharNumber	aadharNumber is required
panNumber	panNumber is required
basePremium	basePremium is required
totalPremium	totalPremium is required

7. Proposal Zone and Yes/No Fields

Field	Accepted	Missing / blank	Invalid
zone	Exact string "1", "2", or "3"	zone is required	zone must be one of: 1, 2, 3
nriDiscount	Yes / No (case-insensitive in current validator)	nriDiscount is required	nriDiscount must be either Yes or No
includeSelf	Yes / No (case-insensitive in current validator)	includeSelf is required	includeSelf must be either Yes or No
bureauDiscount	Yes / No (case-insensitive in current validator)	bureauDiscount is required	bureauDiscount must be either Yes or No

Raw booleans true/false and numeric 1/0 are not valid for these three Yes/No proposal fields in the current backend contract.

8. Adult and Child Count Validation

Field	Rule	Messages
adultCount	Whole number 1–4; must equal populated adults[] count	adultCount is required; adultCount must be a whole number; adultCount must be between 1 and 4; adultCount must match the number of adult members
adults[]	Maximum 4 populated adult members	Maximum 4 adult members are allowed
childCount	Whole number 0–4; must equal populated children[] count	childCount is required; childCount must be a whole number; childCount must be between 0 and 4; childCount must match the number of child members
children[]	Maximum 4 populated child members	Maximum 4 child members are allowed

- childCount = 0 is valid only when no populated child member is supplied.
- childCount = 4 is valid with exactly four populated children.
- Null/empty placeholder member objects must not be counted as valid members.
- Only one Self, Spouse, Father and Mother relationship should be present.

Duplicate relationship message: Duplicate adult relationship is not allowed

9. Tenure, Height, Weight and ABHA

Field	Rule	Validation Messages
selectedTenure	Exactly 1 year	selectedTenure is required; selectedTenure must be 1 year
height	Required for populated members; numeric; 30–	Height is required; Height must be a numeric value; Height must be

	250 cm inclusive	between 30 and 250 cm
weight	Required for populated members; numeric; 5–300 kg inclusive	Weight is required; Weight must be a numeric value; Weight must be between 5 and 300 kg
abhaId	Optional; if supplied exactly 14 digits	ABHA Number must contain exactly 14 digits; ABHA Number must contain digits only; Invalid ABHA Number format

- Do not silently truncate decimal height/weight values.
- ABHA blank/null is valid.
- ABHA local validation is format-only and does not verify existence, activity, ownership, or ABDM identity.
- Do not apply Aadhaar repeated-digit rules to ABHA unless a separate requirement is confirmed.

10. Relationship and Title Validation

Relationship	Valid title	Invalid message
father	Mr	Title must be Mr when relationship is father
mother	Mrs	Title must be Mrs when relationship is mother

Relationship/title validation is independent of DOB/age validation. A Father + Mr entry may still fail the Father-to-Self 21-year age-gap rule.

11. Proposal DOB and Age Validation

Member / rule	Validation
BoltPe DOB format	DD-MM-YYYY
Policy Planner mapped format	YYYY-MM-DD
DOB validity	Must be a valid past date; future DOB rejected
Self	Mandatory; age 18–80
Spouse	Optional; age 18–80; no fixed Self-Spouse age gap
Father	Optional; age 18–80; at least 21 years older than Self
Mother	Optional; age 18–80; at least 21 years older than Self
Children 1–4	Optional; age 0 or above
Self → Child	Self at least 21 years older than each child
Spouse → Child	If spouse present, spouse at least 21 years older than each child

Scenario	Message
Self DOB missing	Self DOB is required
Invalid DOB format	DOB must be in DD-MM-YYYY format
Future DOB	Future DOB is not allowed
Self age outside 18–80	Self age must be between 18 and 80 years
Spouse age outside 18–80	Spouse age must be between 18 and 80 years
Father age outside 18–80	Father age must be between 18 and 80 years
Father-Self gap < 21	Father age must be at least 21 years greater than self age
Mother age outside 18–80	Mother age must be between 18 and 80 years
Mother-Self gap < 21	Mother age must be at least 21 years greater than self age
Child age < 0	Child age cannot be negative
Self-Child gap < 21	Self age must be at least 21 years greater than child age
Spouse-Child gap < 21	Spouse age must be at least 21 years greater than child age

12. Proposal Child Sequence Validation

- Child ages must follow C1 >= C2 >= C3 >= C4.
- Child 1 is oldest; Child 4 is youngest.
- Same age is allowed only for adjacent pairs: C1/C2, C2/C3, C3/C4.
- Non-adjacent same ages are invalid: C1/C3, C1/C4, C2/C4.

- If adjacent ages differ, the younger child must be at least 1 completed year younger.

Example C1,C2,C3,C4	Result	Reason / Message
10, 9, 8, 7	Valid	Descending sequence
10, 10, 8, 7	Valid	C1/C2 adjacent same age
10, 9, 9, 7	Valid	C2/C3 adjacent same age
10, 9, 8, 8	Valid	C3/C4 adjacent same age
10, 10, 8, 8	Valid	Two separate adjacent same-age pairs
10, 9, 10, 8	Invalid	Non-adjacent children cannot have the same age / sequence violation
10, 9, 8, 9	Invalid	Non-adjacent children cannot have the same age / sequence violation
10, 10, 10, 8	Invalid	Non-adjacent children cannot have the same age

Sequence message: Child ages must follow the sequence Child 1 >= Child 2 >= Child 3 >= Child 4

13. Contact and Identity Validation

13.1 Mobile number

Required string. Accept 10-digit Indian mobile number or +91 followed by 10 digits. First digit must be 6, 7, 8, or 9. Spaces, hyphens, alphabets, special characters and other country codes are not allowed. +91 is normalized before Policy Planner.

Condition	Message
Blank / missing	Mobile number is required
Invalid length	Mobile number must contain exactly 10 digits
Invalid starting digit	Mobile number must start with 6, 7, 8, or 9
Invalid +91 format	Mobile number must be a valid 10-digit Indian number or +91 followed by 10 digits
Alphabet / special character	Mobile number must contain digits only, with optional +91 prefix

13.2 Email

Required where applicable. Must contain one @, non-empty local part, domain and domain extension; spaces and multiple @ are invalid.

Condition	Message
Blank / missing	Email ID is required
Missing @	Email ID must contain a valid @ symbol
Missing local part	Email ID must contain a valid username before @
Missing domain	Email ID must contain a valid domain
Missing domain extension	Email ID must contain a valid domain extension
Malformed / spaces / multiple @	Invalid email ID format

13.3 Aadhaar

Application-level format validation only. Exactly 12 digits; no spaces/hyphens/letters/special characters; the same digit repeated in all 12 positions is invalid. This does not perform UIDAI verification.

Condition	Message
Blank / missing when mandatory	Aadhaar number is required
Incorrect length	Aadhaar number must contain exactly 12 digits
Non-numeric	Aadhaar number must contain digits only
Spaces / hyphens / special characters	Invalid Aadhaar number format
000000000000 / any repeated digit 12 times	Aadhaar number cannot contain the same digit repeated 12 times

13.4 PAN

Exactly 10 characters in AAAAA9999A format. First five uppercase letters, next four digits, final uppercase letter. Lowercase may be normalized to uppercase if permitted by product requirement.

Condition	Message
Blank / missing when mandatory	PAN number is required
Incorrect length	PAN number must be exactly 10 characters
Invalid first five	First 5 PAN characters must be alphabets
Invalid characters 6–9	PAN characters 6 to 9 must be digits
Invalid last character	Last PAN character must be an alphabet
Malformed / special character	Invalid PAN number format

13.5 Pincode

Required string; exactly six digits; first digit 1–9. No spaces, hyphens, letters or special characters. This requirement is format validation only; no pincode-master existence check is included.

Condition	Message
Blank / missing	Pincode is required

Incorrect length	Pincode must contain exactly 6 digits
Starts with 0	Pincode must not start with 0
Alphabet / non-numeric	Pincode must contain digits only
Space / hyphen / special character	Pincode must be a valid 6-digit Indian pincode and must not start with 0

14. Annual Income Validation and Mapping

Frontend/BoltPe must send a slab code string, not an arbitrary numeric amount. After validation, BoltPe maps the slab to a predefined numeric annualIncome before calling Policy Planner.

Frontend display	BoltPe slab code	Policy Planner annualIncome
₹3L – ₹5L	3L_5L	400000
₹5L – ₹8L	5L_8L	650000
₹8L – ₹12L	8L_12L	1000000
₹12L – ₹18L	12L_18L	1500000
₹18L – ₹25L	18L_25L	2150000
₹25L – ₹40L	25L_40L	3250000
₹40L and Above	40L_ABOVE	5000000

Condition	Message
Null / missing / empty / blank	annualIncome is required
Unsupported / malformed slab	Invalid annualIncome slab
Numeric/manual amount instead of slab code	Invalid annualIncome slab

15. Personal Accident Proposal Mandatory Fields

Field	Current source requirement / message
productName	productName is required
productType	productType is required
pincode	pincode is required
city	city is required
proposerName	proposerName is required
gender	gender is required
dateOfBirth	dateOfBirth is required
mobileNumber	mobileNumber is required
email	Optional at DTO level; contact validator may apply format if supplied
aadhar_number	Optional at DTO level in current PA DTO
pan_number	Optional at DTO level in current PA DTO
occupationOfInsured	Optional at DTO level
annualIncome	String; mapper applies slab mapping when present
natureOfWorkDesignation	natureOfWorkDesignation is required
coverAmount	coverAmount is required
additionalCovers	Object with ptdBenefitBase, ppdBenefitBase, ttdBenefitBase booleans

16. Validation Execution Order – Proposal

1. Validate wrapper: client_name, formType, insuranceType, data.

2. Resolve formType → insuranceType and reject mismatches.

3. Validate productType.

4. Validate raw cover amount before DTO conversion.

5. For group proposals, validate raw zone, whole-number counts, tenure type, Yes/No fields, and raw member measurement types.

6. Convert data to the applicable DTO and run bean validation.

7. Validate contact/identity fields.

8. Validate additional proposal fields: zone, counts, tenure, Yes/No, height, weight, ABHA, relationship/title, duplicates.

9. Validate DOB, age, relationship gaps and child sequence.

10. Map annualIncome slab to numeric value.

11. Normalize +91 mobile number where applicable.

12. Convert DOB/date fields DD-MM-YYYY → YYYY-MM-DD.

13. Call Policy Planner only after BoltPe validations pass.

17. API Error Behaviour

Validation failures should return HTTP 400 Bad Request. Proposal field validators use fieldErrors for field-level validation. Example:

```
{
  "status": 400,
  "error": "Bad Request",
  "message": "Proposal validation failed",
  "fieldErrors": {
    "adultCount": "adultCount must match the number of adult members",
    "selectedTenure": "selectedTenure must be 1 year",
    "adults[1].height": "Height must be between 30 and 250 cm"
  }
}
```

18. Unified Validation Message Catalogue

Area	Field	Scenario	Exact message
Wrapper	client_name	Missing/blank	client_name is required
Wrapper	client_name	Unsupported	client_name must be bolt_pay
Wrapper	formType	Missing/blank	formType is required
Wrapper	formType	Unsupported	Invalid formType. Allowed values: health, supertopup, pa, hospicash
Wrapper	insuranceType	Missing/blank	insuranceType is required
Wrapper	formType/insuranceType	Mismatch	insuranceType does not match formType. Expected: <TYPE>
Wrapper	data	Missing/not object	data is required
Common	productType	Unsupported	Invalid productType. Allowed values: New, Portability
Proposal	coverAmount	Missing/null	coverAmount is required
Proposal	coverAmount	Invalid HEALTH	Invalid coverAmount for HEALTH insurance
Proposal	coverAmount	Invalid SUPER_TOP_UP	Invalid coverAmount for SUPER_TOP_UP insurance
Proposal	coverAmount	Invalid PERSONAL_ACCIDENT	Invalid coverAmount for PERSONAL_ACCIDENT insurance
Proposal	coverAmount	Invalid HOSPITAL_CASH	Invalid coverAmount for HOSPITAL_CASH insurance
Proposal	zone	Missing/blank	zone is required
Proposal	zone	Unsupported	zone must be one of: 1, 2, 3
Proposal	adultCount	Missing	adultCount is required
Proposal	adultCount	Non-whole	adultCount must be a whole number
Proposal	adultCount	Outside 1–4	adultCount must be between 1 and 4
Proposal	adultCount	Array mismatch	adultCount must match the number of adult members
Proposal	adults	More than 4	Maximum 4 adult members are allowed
Proposal	childCount	Missing	childCount is required

Proposal	childCount	Non-whole	childCount must be a whole number
Proposal	childCount	Outside 0–4	childCount must be between 0 and 4
Proposal	childCount	Array mismatch	childCount must match the number of child members
Proposal	children	More than 4	Maximum 4 child members are allowed
Proposal	selectedTenure	Missing	selectedTenure is required
Proposal	selectedTenure	Not 1	selectedTenure must be 1 year
Proposal	height	Missing	Height is required
Proposal	height	Wrong type	Height must be a numeric value
Proposal	height	Outside 30–250	Height must be between 30 and 250 cm
Proposal	weight	Missing	Weight is required
Proposal	weight	Wrong type	Weight must be a numeric value
Proposal	weight	Outside 5–300	Weight must be between 5 and 300 kg
Proposal	abhaId	Wrong length	ABHA Number must contain exactly 14 digits
Proposal	abhaId	Alphabetic	ABHA Number must contain digits only
Proposal	abhaId	Malformed	Invalid ABHA Number format
Proposal	title	Father title invalid	Title must be Mr when relationship is father
Proposal	title	Mother title invalid	Title must be Mrs when relationship is mother
Proposal	relationship	Duplicate adult role	Duplicate adult relationship is not allowed
Proposal	nriDiscount	Missing/blank	nriDiscount is required
Proposal	nriDiscount	Not Yes/No	nriDiscount must be either Yes or No
Proposal	includeSelf	Missing/blank	includeSelf is required
Proposal	includeSelf	Not Yes/No	includeSelf must be either Yes or No
Proposal	bureauDiscount	Missing/blank	bureauDiscount is required
Proposal	bureauDiscount	Not Yes/No	bureauDiscount must be either Yes or No
DOB/Age	Self DOB	Missing	Self DOB is required
DOB/Age	DOB	Bad format	DOB must be in DD-MM-YYYY format
DOB/Age	DOB	Future	Future DOB is not allowed
DOB/Age	Self	Outside 18–80	Self age must be between 18 and 80 years
DOB/Age	Spouse	Outside 18–80	Spouse age must be between 18 and 80 years
DOB/Age	Father	Outside 18–80	Father age must be between 18 and 80 years
DOB/Age	Father/Self	Gap < 21	Father age must be at least 21 years greater than self age
DOB/Age	Mother	Outside 18–80	Mother age must be between 18 and 80 years
DOB/Age	Mother/Self	Gap < 21	Mother age must be at least 21 years greater than self age
DOB/Age	Child	Negative	Child age cannot be negative
DOB/Age	Self/Child	Gap < 21	Self age must be at least 21 years greater than child age
DOB/Age	Spouse/Child	Gap < 21	Spouse age must be at least 21 years greater than child age
DOB/Age	Children	Sequence increases	Child ages must follow the sequence Child 1 >= Child 2 >= Child 3 >= Child 4
DOB/Age	Children	Non-adjacent same age	Non-adjacent children cannot have the same age
Contact	Mobile	Missing	Mobile number is required
Contact	Mobile	Bad length	Mobile number must contain exactly 10 digits
Contact	Mobile	Bad starting digit	Mobile number must start with 6, 7, 8, or 9
Contact	Mobile	Bad +91	Mobile number must be a valid 10-digit Indian number or +91 followed by 10 digits
Contact	Mobile	Non-digit	Mobile number must contain digits only, with optional +91 prefix
Contact	Email	Missing	Email ID is required
Contact	Email	Missing @	Email ID must contain a valid @ symbol
Contact	Email	Missing username	Email ID must contain a valid username before @
Contact	Email	Missing domain	Email ID must contain a valid domain
Contact	Email	Missing extension	Email ID must contain a valid domain extension
Contact	Email	Malformed	Invalid email ID format
Identity	Aadhaar	Missing	Aadhaar number is required
Identity	Aadhaar	Bad length	Aadhaar number must contain exactly 12 digits
Identity	Aadhaar	Non-digit	Aadhaar number must contain digits only
Identity	Aadhaar	Malformed	Invalid Aadhaar number format
Identity	Aadhaar	Repeated digit x12	Aadhaar number cannot contain the same digit repeated 12 times
Identity	PAN	Missing	PAN number is required
Identity	PAN	Bad length	PAN number must be exactly 10 characters
Identity	PAN	First 5 invalid	First 5 PAN characters must be alphabets
Identity	PAN	Chars 6–9 invalid	PAN characters 6 to 9 must be digits
Identity	PAN	Last char invalid	Last PAN character must be an alphabet
Identity	PAN	Malformed	Invalid PAN number format
Contact	Pincode	Missing	Pincode is required
Contact	Pincode	Bad length	Pincode must contain exactly 6 digits
Contact	Pincode	Starts 0	Pincode must not start with 0
Contact	Pincode	Non-digit	Pincode must contain digits only

Contact	Pincode	Malformed	Pincode must be a valid 6-digit Indian pincode and must not start with 0
Income	annualIncome	Missing/blank	annualIncome is required
Income	annualIncome	Unsupported/numeric	Invalid annualIncome slab

19. Source Alignment Notes / Gaps to Resolve

Topic	Current combined interpretation / action
Proposal request-body PRD vs current source	The request-body PRD lists health, supertopup and hospicash only. Current source also supports formType=pa ↔ PERSONAL_ACCIDENT. This combined document includes PA because the uploaded source and annual-income PRD support it.
client_name invalid message	Request-body PRD says “Invalid client_name. Allowed value: bolt_pay”. Current service throws “client_name must be bolt_pay”. Decide one canonical frontend contract message if exact consistency is required.
Mapping mismatch message	Request-body PRD says “formType does not match insuranceType”. Current service throws “insuranceType does not match formType. Expected: <TYPE>”.
Proposal Hospital Cash cover amount	Proposal cover PRD/current source use large sum-insured values (₹10L–₹5Cr set) for HOSPITAL_CASH, while Enquiry/Plans Hospital Cash uses room-rent values 500–5000. They are documented separately and must not be mixed.
Proposal group field naming	Group request DTO uses sumInsured, while proposal cover validator reports errors under coverAmount. This is current source behaviour.
Child DTO fields	Current ChildMemberRequest contains relationship, fullName, dob, height, weight and medicalCondition. It does not contain child abhaId or preExistingDisease, even if a frontend sample sends them.
Error aggregation	The PRDs ask for all applicable proposal field errors together. Current validators collect errors within each validator, but service execution is sequential; an earlier validator exception can prevent later validator categories from being collected. A shared collector/refactor is needed for guaranteed cross-validator aggregation.
Enquiry category mandatory message	Dedicated zone/category PRD uses “category is required”; current enquiry DTO/service uses “Kindly select category”.

20. Final Acceptance Checklist

- ☐ All four products are validated independently; values valid for one product are not automatically valid for another.
- ☐ Enquiry and Proposal cover-amount lists remain separate where requirements differ.
- ☐ Proposal wrapper client_name/formType/insuranceType/data are validated before downstream processing.
- ☐ formType and insuranceType must represent the same product.
- ☐ Proposal zone accepts only exact string 1/2/3.
- ☐ Yes/No fields accept only Yes/No strings in the BoltPe request.
- ☐ Adult count is 1–4 and child count is 0–4; declared counts match populated arrays.
- ☐ Only one-year proposal tenure is accepted.
- ☐ Height and weight boundaries are enforced for populated members.
- ☐ ABHA is optional and format-only when supplied.
- ☐ Father/Mother title rules and duplicate adult relationship rules are enforced.
- ☐ DOB, age, 21-year relationship gaps and child sequence rules are enforced.
- ☐ Mobile, email, Aadhaar, PAN and pincode validations run before Policy Planner.
- ☐ Annual income slab is validated and mapped to the configured numeric amount.
- ☐ Invalid requests return HTTP 400 and do not invoke Policy Planner/provider APIs.
- ☐ Where exact message inconsistencies exist between PRDs and source, a canonical message must be selected before final API contract freeze.
