Proposal Form Annual Income Validation - PRD

Annual Income Slab Validation and Policy Planner Mapping

This document defines the backend validation and mapping rules for the Annual Income field used in the BoltPe insurance proposal flow.

1. Purpose

The frontend will allow the user to select an Annual Income slab. BoltPe will validate the selected slab and convert it into a predefined numeric annualIncome value before sending the proposal request to Policy Planner. The frontend must not send an arbitrary numeric annual income amount for this field.

2. Applicable Proposal Flow

- Health - formType: health
- Super Top-Up - formType: supertopup
- Hospital Cash - formType: hospicash
- Personal Accident - formType: pa, where the same annual income slab contract is used

3. Frontend Contract

Frontend must send the Annual Income slab code as a string in the annualIncome field.

Example:

```
"annualIncome": "3L_5L"
```

4. Allowed Annual Income Slabs and Backend Mapping

Frontend Display	Frontend / BoltPe Slab Code	Policy Planner annualIncome
₹3 Lakh - ₹5 Lakh	3L_5L	400000
₹5 Lakh - ₹8 Lakh	5L_8L	650000
₹8 Lakh - ₹12 Lakh	8L_12L	1000000
₹12 Lakh - ₹18 Lakh	12L_18L	1500000
₹18 Lakh - ₹25 Lakh	18L_25L	2150000
₹25 Lakh - ₹40 Lakh	25L_40L	3250000
₹40 Lakh and Above	40L_ABOVE	5000000

Mapping rule: for closed slabs, BoltPe uses the midpoint of the selected range. For ₹40 Lakh and Above, BoltPe uses the fixed value ₹50 Lakh (5000000).

5. Validation Rules

- **Required:** annualIncome must be present in the proposal request.
- **Data type:** annualIncome must be a string slab code, not a manually entered numeric amount.
- **Allowed values:** Only 3L_5L, 5L_8L, 8L_12L, 12L_18L, 18L_25L, 25L_40L, and 40L_ABOVE are valid.
- **Blank value:** Null, empty, or blank annualIncome is invalid.

- **Unsupported slab:** Any value outside the configured slab codes is invalid.
- **Mapping:** After successful validation, BoltPe converts the slab code to the mapped numeric value before calling Policy Planner.
- **No silent fallback:** BoltPe must not silently accept or convert an unsupported slab.

6. Validation Error Messages

Condition	Error Message
annualIncome is null, missing, empty, or blank	annualIncome is required
Unsupported or malformed slab code	Invalid annualIncome slab
Numeric/manual amount supplied instead of slab code	Invalid annualIncome slab

7. Request and Vendor Mapping Example

BoltPe request:

```
{
  "selectedTenure": 1,
  "annualIncome": "3L_5L",
  "nriDiscount": false
}
```

Policy Planner request after BoltPe mapping:

```
{
  "selectedTenure": 1,
  "annualIncome": 400000,
  "nriDiscount": false
}
```
