API	Method	Endpoint	Purpose
Plans	POST	/api/v1/insurance/plans	Fetch standardized plans/premiums
Proposal Form	POST	/api/v1/insurance/proposals/save	Validate and submit proposal
Health Check	GET	/api/v1/insurance/health	Verify service reachability

Important response-data note: The HEALTH Plans response is based on the actual response supplied by the user (11 plans). To keep this document readable, one representative plan is shown while preserving the response structure. Actual runtime responses for SUPER_TOP_UP, PERSONAL_ACCIDENT and HOSPITAL_CASH were not supplied, so their sections use clearly marked placeholders instead of fabricated insurer/premium values.
